Tech Stack

- ▶ Python, Java, C/C++, SQL
- ▶ FastAPI, Spring Boot, PyTorch
- ▶ TypeScript, React, Next.js, Angular
- ▶ PostgreSQL, Qdrant, Redis
- ▶ LLMs, RAG, MCP, AI Agents
- ▶ Docker, Git, Linux

Languages

- ▶ **Spanish** - Native
- ▶ **Galician** - Native
- ▶ **English** - B2 (Cambridge B2 First / FCE)

Awards

- ▶ **Excellence Award** — Akademia
- ▶ Future Builders, Fundación Innovación Bankinter

Innovation

- ▶ **Akademia Future Builders** — Fundación Innovación Bankinter
- ▶ **HackSpain 2026** — taiafox
- ▶ **HackUDC 2026**
- ▶ **Hacktoberfest 2025**
- ▶ **Hiperbaric Challenge**

Certifications

- ▶ **Next.js App Router Fundamentals** — Vercel
- ▶ **OCI Foundations Associate** — Oracle
- ▶ **Artificial Intelligence Fundamentals** — IBM

About me

Software & AI Engineer finishing a Bachelor's Degree in Computer Engineering, focused on **applied AI, agents, RAG and healthcare software**. Experience building intelligent systems, backends and AI products, with a focus on turning emerging technologies into useful, scalable solutions with real-world impact.

Professional Experience

Clínica Guitián

AI Software Engineer (10/2026 – Present)

Building local agentic AI systems for healthcare automation, integrating LLMs, Windows/Android agents, clinical software and DICOM workflows.

ANFAIA - Association for AI Acceleration

AI Engineer Scholar (07/2026 – 08/2026)

Design and development of **Agentic Smart Health**, a multi-agent platform for multimodal clinical data (DICOM, STL, images and PDF), integrating AI tools, 3D visualization and MCP-based workflows.

DataSpartan

Software Development Engineer Intern (09/2025 – 12/2025)

Professional software development in collaborative environments, working with backend architecture, version control, databases and software engineering best practices.

Banco Santander · Universidade de Vigo

University Training Scholarship (10/2025 – 06/2026)

Technical support and maintenance of IT systems, incident resolution and infrastructure improvements.

Academia Jorge-Juan · Ourense

STEM Tutor (09/2026 – Present)

Teaching Mathematics, Physics and Chemistry, adapting complex concepts to different academic levels while strengthening technical communication and synthesis skills.

Selected Projects

Agentic Smart Health — Healthcare-oriented multi-agent system for integrating and reasoning over multimodal clinical information, combining AI, specialized tools and interoperable workflows.

taiafox · HackSpain 2026 — Wildfire crisis management and emergency-response support platform featuring AI/voice agents, automated classification and an operational simulation developed for the hackathon.

PeponBot — Multimodal AI project that repurposes a smartphone as a physical interface for environmental perception and language-model-assisted reasoning.

Education

Bachelor's Degree in Computer Engineering - GPA equivalent: Very Good
Universidade de Vigo (ESEI) - (2023 – Present)

Bachelor's Degree coursework in Mathematics
Universidad de Santiago de Compostela - (2021 – 2023)

Community

GDG Ourense — Staff Member: contributing to the organization of **DevFest Ourense 2026**, speaker and sponsor outreach, and initiatives to strengthen the local tech community.
